

Kalp Senghani

Full Stack Developer

senghani.kalp@gmail.com • 6472437874 • Toronto, ON • LinkedIn

Summary

Full Stack Developer with 3+ years of experience building scalable web applications using modern JavaScript frameworks (React, Vue.js, Angular) and backend technologies (Node.js, Spring Boot). Experience in improving application performance by up to 30% through optimized CI/CD pipelines and database query optimization. Expertise in cloud deployment (AWS), containerization (Docker, Kubernetes), and microservices architecture, with experience supporting applications serving 10K+ active users. Strong advocate of Agile methodologies with a commitment to code quality, testing, and collaborative development practices.

Technical Skills

Programming Languages

JavaScript, TypeScript, Python, Java

Back-End Technologies

Node.js, Spring Boot, RESTful Web Services, Microservices, Next.js

Databases & Data Platforms

MongoDB, PostgreSQL, MySQL, SQL Server, Firebase

Version Control, CI/CD & DevOps

Git, GitHub, GitLab, Docker, Kubernetes, Jenkins, AWS Lambda

Methodologies & Project Tools

Jira, Scrum, SDLC

Front-End Technologies

Angular, React, Vue.js, HTML5, CSS3, Bootstrap, RxJS

ORM & Data Access

Hibernate, Spring Data JPA

Cloud Platforms

AWS

Testing & Debugging Tools

Debugger, Postman, Cypress

Operating Systems

Linux, Windows

Experience

Full Stack Developer, IT Pros

04/2023 – Present

- Built interactive single-page applications with Vue.js and React, integrating RESTful APIs and improving page load performance by 20%
- Implemented frontend features using HTML5, CSS3, and RxJS for projects with positive user feedback
- Developed backend services using Node.js and Spring Boot, integrating with MongoDB and PostgreSQL databases for 6+ projects
- Configured CI/CD pipelines using Jenkins and GitLab with Docker integration, reducing build time by 30% across 4 projects
- Designed database schemas for applications using MongoDB and MySQL, ensuring data integrity and scalability
- Performed API testing using Postman and debugger tools, identifying and resolving 25+ bugs across 6 applications before production release
- Actively participated in Agile/Scrum ceremonies using Jira, contributing to sprint planning and daily standups for 5+ projects

Full Stack Developer, Smartfox

01/2022 – 12/2022

- Developed responsive UI components using React.js and Angular with TypeScript and Bootstrap, supporting 10K+ active users across 4 applications
- Created data access layers using Hibernate and Spring Data JPA, optimizing 8 database queries and reducing load time by 25%
- Implemented event-driven messaging with Kafka and RabbitMQ, processing messages for real-time data synchronization
- Deployed containerized applications to AWS using Docker and Kubernetes, supporting 5+ microservices in production
- Optimized database queries in MySQL and PostgreSQL, implementing caching strategies that improved response times by 20% for 5 APIs
- Implemented unit tests using Cypress for frontend components, achieving 75% code coverage across React applications
- Conducted code reviews for 4 team members, ensuring adherence to coding standards and best practices

Education

Advanced Diploma in Computer Programming and Analysis,
George Brown College

09/2022 – 04/2025
